

Digital Laser Module

Digital laser module returns temperature information through serial communication

Serial communication parameters: baudrate=200bps 1start bit 1stop bit no chenk bit

Packet details:

Inex 1	Index 2	Index 3	Index 4	Index 5	Index 6
head	Packet length	version	Laser module type	Laser temperature	Check sum
0xFF	0x06	1	1=30x30-20W 2=40x40-35W	0~100°C	Check sum

Data frequency: 2Hz

Analog Laser Module

The analog laser module obtains the temperature by measuring the voltage.

The corresponding relationship between the voltage and the temperature is as follows

0°C Vout = 642mV

1°C Vout = 664mV

2°C Vout = 687mV

3°C Vout = 710mV

4°C Vout = 733mV
